

Open the doors to digital

Digital Doorway Free devices and data for the digitally excluded

As more of our essential services move online, being digital has never been so important

Do you work with residents in the Dorset Council area that need help getting online? You might work with people who lack digital skills or cannot afford devices or broadband?

Then Dorset Council's Digital Doorway project could help:

- We have free laptops/tablets to give to people in digital need
- Additional free data if needed
- Free training and support from volunteer digital champions

If you work with a resident who is aged 18 and over who is digitally excluded, please refer them to our Digital Doorway scheme and open the doors to the digital world.
